

How to sync Story Points custom fields in Jira Cloud

JIRA SERVER

JIRA CLOUD

In Jira, story points are implemented via a custom field called "Story Points".

You can sync JIRA Story Points field as a simple text field.

Note!

Make sure that you have Story Points field on both sides.

Source side

Add the code below into the **Outgoing sync** to send Story Points field data

Data Filter

```
replica.customFields."Story Points" = issue.customFields."Story Points"
```

Destination side

Incoming sync

add synced Story Points field data

```
issue.customFields."Story Points".value = replica.customFields."Story Points".value
```
