

Jira specific elements

Remote issue tab

This tab details out what information is known about the remote issue:

Unexalate operation

Details about the operation which stops synchronization of an issue.

Remote issue link

Check out how you can display the remote issue link on the issue view.

Exalate Now post function

Start issue synchronization automatically using a post-function in Jira.

Workflow conditions

Multiple workflow orchestrations

Getting a workflow orchestration between 2 different workflows defined and implemented is already a challenge. The fact is that Jira allows having multiple workflows per project/issue type, and arranging that dance is a real challenge.
