

Project

[Back to Issue fields available for synchronization](#)

| | |
|---------------|-------------------------------|
| Object | project |
| Fields | id, key, name, lead, versions |
| Introduced in | 0.5 |

Fields

| # | Field name | Comment | Object type |
|---|------------|---|-----------------------------------|
| 1 | id | | Long |
| 2 | key | | String |
| 3 | name | | String |
| 4 | lead | The project lead | User |
| 5 | versions | A list of all the versions associated to this project | Array of versions |

Comments

issue.projectKey is a shortcut to set the project. for instance

```
issue.projectKey = "DEMO"
```

is equivalent to

```
issue.project = nodeHelper.getProject("Demo")
```
