

Table Grid Next Generation

Are you using the Table Grid Next Generation for Jira Cloud? Check [its documentation here](#).

Are you using the Legacy Table Grid Editor for Jira Server? Check [its documentation here](#).

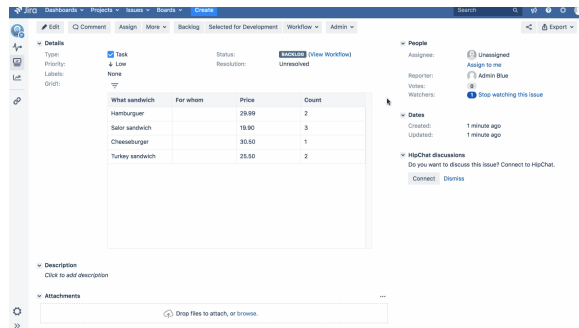

Welcome to the Table Grid Next Generation documentation!

The Table Grid Next Generation is an add-on which allows you to view and edit data in a grid form. You can configure the grid via simple configuration dashboard.

Add a table to your JIRA issue view as a custom field of type Table Grid.

Use the grid in JIRA to structure your data in editable tables. Most common use cases:

- Collect data from surveys during telemarketing actions
- Keep track of test execution
- Create and manage offers and quotes
- Track subtasks
