

# Link to attachments from a table grid column

## Introduction

Is it possible to have attachment column in a table grid?

## Solution

There is no explicit attachment column, but you can actually use following approach:

1. attach the files to the issue
2. mention the file in a text column which is wiki enabled using `[col.xyz.renderer|https://wiki.idalko.com/display/TGPD/col.xyz.renderer]` property

Using the notation `\[^attachmentname\]` in the text column will provide a link to the file
