

Enable / disable individual toolbar buttons

Unknown macro: 'doctop'

This article is deprecated

This article is deprecated as the feature has been implemented. Please see [gd.toolbar.disable](#) property for details

I know this topic has been discussed a lot among Table Grid Editor users but I still want to know if this feature has a workaround or anything like that? For example, I would want to disable the Add Multiple Rows, Clear All Duplicates, Clear All Not Modified and Clear All Data buttons. is there a possibility to get this done

Feature Request

We have a feature request to implement this behaviour as a grid property

IGRID-3243 - Jira project doesn't exist or you don't have permission to view

it.

Workaround

Configure the announcement banner with following tag ([how?](#))

As a workaround, you might add a style tag to your announcement banner

'customfield_12670' below should be replaced with the customfield id of your grid, where you would like to disable the buttons

```
<style type="text/css">
#refresh_customfield_12670_grid { display:none; }
#customfield_12670_grid_cmb_add { display:none; }
#customfield_12670_grid_cmb_duplicate { display:none; }
#customfield_12670_grid_cmb_clearall { display:none; }
#customfield_12670_grid_cmb_modified { display:none; }
#customfield_12670_grid_cmb_allduplicates { display:none; }
</style>
```
